Cristopher López Santana

Senior Frontend Engineer

London, UK | cristopher.lopezsantana@gmail.com | im.ramclen.xyz | github.com/ramclen | linkedin.com/in/cristopherlopez

SUMMARY

Senior Frontend Engineer with 12+ years designing, building and scaling web applications for enterprise, startup and public-sector products. Specialised in React and TypeScript, with deep experience in frontend architecture, accessibility (WCAG), performance and automated testing. Currently at Yoti, where I own frontend delivery for key product areas, set frontend standards, mentor engineers and lead the team's adoption of AI-assisted development. At my best in remote, cross-functional teams, taking features from early design conversations through to production.

KEY ACHIEVEMENTS

- Architected a micro-frontend with a client-side caching layer for a core Yoti product area, materially reducing initial load times.
- Lead my team's AI adoption at Yoti: MCP servers, agentic workflows and shared prompt and skill libraries now used in day-to-day development.
- Raised engineering standards beyond my own team by designing and running company-wide workshops on frontend best practices.
- Co-founded two developer communities in Gran Canaria, Google Developers Group and Gran Canaria Ágil.

CORE SKILLS

Frontend	React, TypeScript, JavaScript (ES6+), Redux, Vue.js, AngularJS, HTML5, CSS3/SASS, Tailwind CSS, GraphQL, PWA, Accessibility (WCAG), Component Libraries, Micro-frontends, Frontend Architecture
Backend & APIs	Node.js, REST APIs, PHP (Symfony), MySQL
Testing & Quality	Jest, Enzyme, WebDriver, Mocha, TDD, Automated QA Tooling
Tools & Practices	Git, Docker, Jenkins, Concourse CI, CI/CD Pipelines, Agile/Scrum, Code Review, Mentoring, Technical Workshops
AI Engineering	MCP (Model Context Protocol) servers, Agentic Workflows, Prompt & Skill Design, AI-Assisted Development (Claude Code), LLM Tooling

EXPERIENCE

Senior Frontend Engineer · Yoti, London, UK (Remote) Jan 2022 – Present

Global digital identity platform

- Own frontend delivery for key product areas, working closely with UX/UI designers, backend engineers and product stakeholders to ship well-integrated, production-grade features.
- Architected a micro-frontend for a core product area and introduced a client-side caching layer, materially reducing initial load times and improving perceived performance.
- Drive frontend best practices across the engineering team (code standards, component patterns and testing strategy), improving consistency, reliability and maintainability.
- Mentor junior and mid-level engineers through code review, pairing and structured feedback, raising the team's overall engineering standard.
- Designed and led company-wide internal workshops on frontend best practices, scaling knowledge-sharing beyond the immediate team.
- Completed Yoti's internal AI training programme and now lead the team's AI adoption: building MCP servers, agentic workflows and reusable prompt and skill libraries, and coaching engineers on bringing AI-assisted development into their daily work.

Tech: React, TypeScript, JavaScript, Redux, CSS/SASS, Jest, Enzyme, PWA, MCP, Claude Code

Frontend Engineer · Yoti, London, UK (Remote) Sep 2020 – Dec 2021

- Built responsive, scalable frontend applications with React, Redux and TypeScript, following web standards and accessibility guidelines.
- Delivered frontend features for a platform supporting health organisations during the COVID-19 pandemic, improving patient-tracking and operational workflows.
- Improved application performance across mobile and desktop through code optimisation, refactoring and rigorous testing.

Tech: React, Redux, TypeScript, JavaScript, CSS/SASS

Software Engineer · Foundry, London, UK Jan 2018 – Sep 2020

Flix, a storyboarding and previsualisation tool used across the film industry

- Built internal software systems that automate quality assurance across the software development lifecycle.
- Created and maintained CI pipelines in Jenkins, improving automated test coverage and release reliability.
- Helped define testing practices and workflows for Software Engineers in Test, raising QA standards across the team.

Tech: TypeScript, JavaScript, Node.js, Docker, Jenkins, WebDriver, Mocha, Bash

Front End Developer · Norwegian Technology, Spain (Remote) Dec 2015 – Jan 2018

- Developed a dynamic web application that lets companies create and manage their own pages.
- Co-designed the REST API and database schema with backend developers, ensuring robust frontend/backend integration.
- Partnered closely with the product owner to shape features and improve the user experience.

Tech: React, AngularJS, Angular Material, Bootstrap, jQuery

Software Developer · The Singular Factory, Spain Jul 2014 – Aug 2015

- Built RedPROMAR end to end for the Government of the Canary Islands: back office, REST API and public website for a citizen-science platform tracking marine wildlife sightings.
- Delivered further public-facing websites, admin panels and REST APIs for client projects, and contributed to an Android mobile application.
- Supported the wider team with Git workflows, Java and software design patterns.

Tech: PHP (Symfony), MySQL, JavaScript, jQuery, Java, Android

EDUCATION

Universidad de Las Palmas de Gran Canaria 2010 – 2015

B.Eng., Computer Engineering (Software Engineering)

LANGUAGES

Spanish	Native
English	Full professional

LEADERSHIP & COMMUNITY

Co-founder, Google Developers Group Gran Canaria (2014 – 2016). Organised events sharing Google technologies with the local developer community.

Co-founder, Gran Canaria Ágil (2013 – 2016). Promoted Agile practices in the regional tech community.
